IDP Mobile

Smart Documents, Boundless
Mobility with IDP Mobile!

www.id.dentsusoken.com/idpmobile

IDP Mobile refers to a technology or application that facilitates intelligent and automated document processing through mobile devices like smartphones or tablets. It encompasses capabilities such as comprehending unstructured documents and employing artificial intelligence to capture, analyze, and manage documents seamlessly. Its versatility enables utilization across diverse settings, spanning from business to non-business environments, all while maintaining mobility and convenience.

What can IDP Mobile do?

Discover the convenience of managing your documents with IDP Mobile!

With IDP Mobile, you can effortlessly handle both business and non-business documents right at your fingertips.

Non-business documents such as parking receipts, toll receipts, gas receipts, or restaurant bills can be swiftly and efficiently managed. Meanwhile, business documents like ID cards, Tax IDs, family cards, vehicle registration certificates, and vehicle licenses can be easily accessed and organized.

Enhance your productivity and efficiency with IDP Mobile!

Document Capture

Users capture images or upload documents to their mobile device, whether it's a photo of a physical document or a digital file.

Document Recognition

IDP Mobile employs OCR technology to recognize text within documents, enabling it to extract information effectively.

Data Processing

After identifying the text, IDP Mobile processes the data using programmed algorithms and rules, extracting information like dates, reference numbers, or monetary amounts.

Document Understanding

IDP Mobile utilizes artificial intelligence to comprehend the document's context, including recognizing its type (e.g., invoice, contract, or letter) and the relationships between the information within it.

Validation and Correction

The system automatically validates extracted data for accuracy and allows users to make corrections if errors are detected.

Integration with Other Systems

IDP Mobile integrates with document management software or enterprise systems to connect and incorporate processed data seamlessly.

Business Process Automation

Extracted document information automates diverse business processes like financial report generation, invoicing, and contract approvals.

Document Storage and Management

IDP Mobile aids structured storage and document management for enhanced accessibility and ease of management.
