Functions in FAAS

Create insight
This function allows you to create new insight by uploading bank statements, input general information and related parties.

View consolidation and reconsolidation
This function allows you to view consolidation analysis for the bank statements you uploaded for and insight and edit categories for each transaction.

View report and re-report
This function allows you to view FAAS bank statement insights and redo report if needed.

Fraud and risk indicator
Manipulated (fake) indicator:
- Regular things in banking that shouldn't happen (according to regulation)
- Fraudulence indicator: customer negative behaviour in bank statement
- Risk indicator: all things related to loans.
